Volume 7 October 2011

Hello we're finally back, with a new builder Steele and Bray who started work on site on the 19th September and work has started to progress again, the third lift scaffold is now up and external brickwork is proceeding nicely. The roofers are on site to repair the weather damage and preparing to complete the roof over the next few weeks. Over the next few months we hope the images will look a bit more exciting.
