Volume 2 December 2010

Now the builders are on site things have started to move, as you can see from the pictures below.

The old cladding has been removed to reveal the steel skeleton of the new build. There is major effort of recycling taking place, all the concrete dug up will be broken up on site to go back as bases for various areas, the trees that have been removed which were in a tangled mess, these will all go for recycling and with their removal new and healthy trees will be planted which will be of a native species such as Oak, Ash, Small leaved Lime, Birch, Wild Cherry, Scot's Pine and Hawthorn.
