

## **New Trees for Clipston Way**

**Clipston Way is a nice little close that benefits from having prominent grassed areas. In addition to grass, there has always been a number of trees adding natural colour for the pleasure of residents and visitors. Over the years a number of these trees have been lost probably due to utility and cable excavations which appear to have caused the demise of some well established specimens. Also when some new trees were planted a few years ago these were lost due to vandalism.**

**The Parish Council has reacted positively to a request for replacements and two young trees have been planted on the green in front of the houses. The above picture shows one of the new trees and the residents are grateful to the Parish Council for responding to the appeal to return Clipston Way back to its former natural attractiveness.**
